### **Centennial '67 Public School**

#### **Policy Statement:**

Providing students with an opportunity to learn and develop in a safe, inclusive, and accepting school climate is a shared responsibility in which school boards and schools play an important role. The school climate may be defined as the learning environment and relationships found within a school community. The following are some characteristics of a positive school climate:

- Students, staff members, and parents feel safe, included and accepted.
- All members of the school community demonstrate respect, fairness, and kindness in their interactions, building healthy relationships that are free from discrimination and harassment.
- Students are encouraged and given support to be positive leaders and role models in their school community.
- Open and ongoing dialogue takes place between the principal, staff members, parents and students. All partners are actively engaged.
- The learning environment, instructional materials, and teaching and assessment strategies reflect the diversity of all learners.
- Every student is inspired and given support to succeed in an environment of high expectations.
- Bullying prevention and awareness-raising strategies for students and staff are reinforced through curriculum-linked programs

Research shows that bullying is a serious issue that has far-reaching consequences for individuals, their families and peers, and the community at large. Research also indicates that a clearly-articulated school-wide bullying prevention policy is the foundation of effective bullying prevention programming.

#### **Bullying:**

- Adversely affects a student's well-being and ability to learn.
- Adversely affects the school climate, including healthy relationships.
- Will not be accepted on school property, at school-related activities, on school buses, or in any other circumstances (e.g., online) where engaging in bullying will have a negative impact on the school climate.
