

Vision Screening:

New York State Education Law requires that students receive near and far vision screening as part of the school health services provided by each school district. This screening will be done for all new entrants and for students in grades K, 1, 3, 5, 7 & 11. The purpose of this requirement is to detect the presence of vision problems likely to impede a student's learning. We will be conducting vision screening for our students starting in October. If the results of the screening indicate that your child requires further follow-up you will receive written notification.

Hearing Screening:

New York State Education Law requires that students receive hearing screening as part of the school health services provided by each school district. This screening will be done for all new entrants and for students in grades K, 1, 3, 5, 7 & 11. The purpose of this requirement is to detect the presence of hearing problems likely to impede a student's learning. We will be conducting hearing screening for our students starting in October. If the results of the screening indicate that your child requires further follow-up you will receive written notification.

Scoliosis Screening:

New York State Education Law requires that all students receive scoliosis screening as part of the health services provided by each school district. This screening will be done for all girls in grades 5 & 7, and all boys in grade 9. The purpose of the scoliosis screening is early identification of those students. With early identification and intervention, scoliosis may be prevented from progressing so that its interference with mobility, activity and comfort is minimized. We will conduct scoliosis screening for our students starting in January. If the results of the screening indicate that your child requires further follow-up you will receive written notification.
